DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on applications filed in the Republic of Korea on 16 June 2000 and 11 October 2000. It is noted, however, that applicant has not filed a certified copy of the Korean applications as required by 35 U.S.C. 119(b).

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 710, 720, 730, 740, 750, and 760. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

At page 3, lines 18, 19, 23, and 24, $k_1, \dots k_n$, and k_i are not defined.

At page 3, lines 20-21, the sentence is improperly structured. A verb is missing.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3744

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-3 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited. Applicant is also referred to section 608.01(m) of the MPEP regarding proper claim format.

In addition to the improper sentence structure, the claims also have multiple instances of lack of antecedent basis: for example, "the annotated 'sliding' ghost metaphor" in lines 1-2 of claim 1. Also, quotations, such as surrounding "sliding" in line 1 of claim 1 are impermissible. Further, the list of parentheses such as used in line 3 of claim 1 are impermissible.

Due to the extent of the improper structure of the claims, it is impossible to determine the metes and bounds of Applicant's invention. Accordingly, examination on the merits is precluded at this time. Applicant must rewrite the claims in accordance with USPTO requirements.

Conclusion

Art Unit: 3744

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Onda et al. discloses a game system that tracks player movements.

Kaku et al. discloses a means for tracking motion in virtual space.

Tonomura et al. discloses a movement measuring device for tracking body movements.
